WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

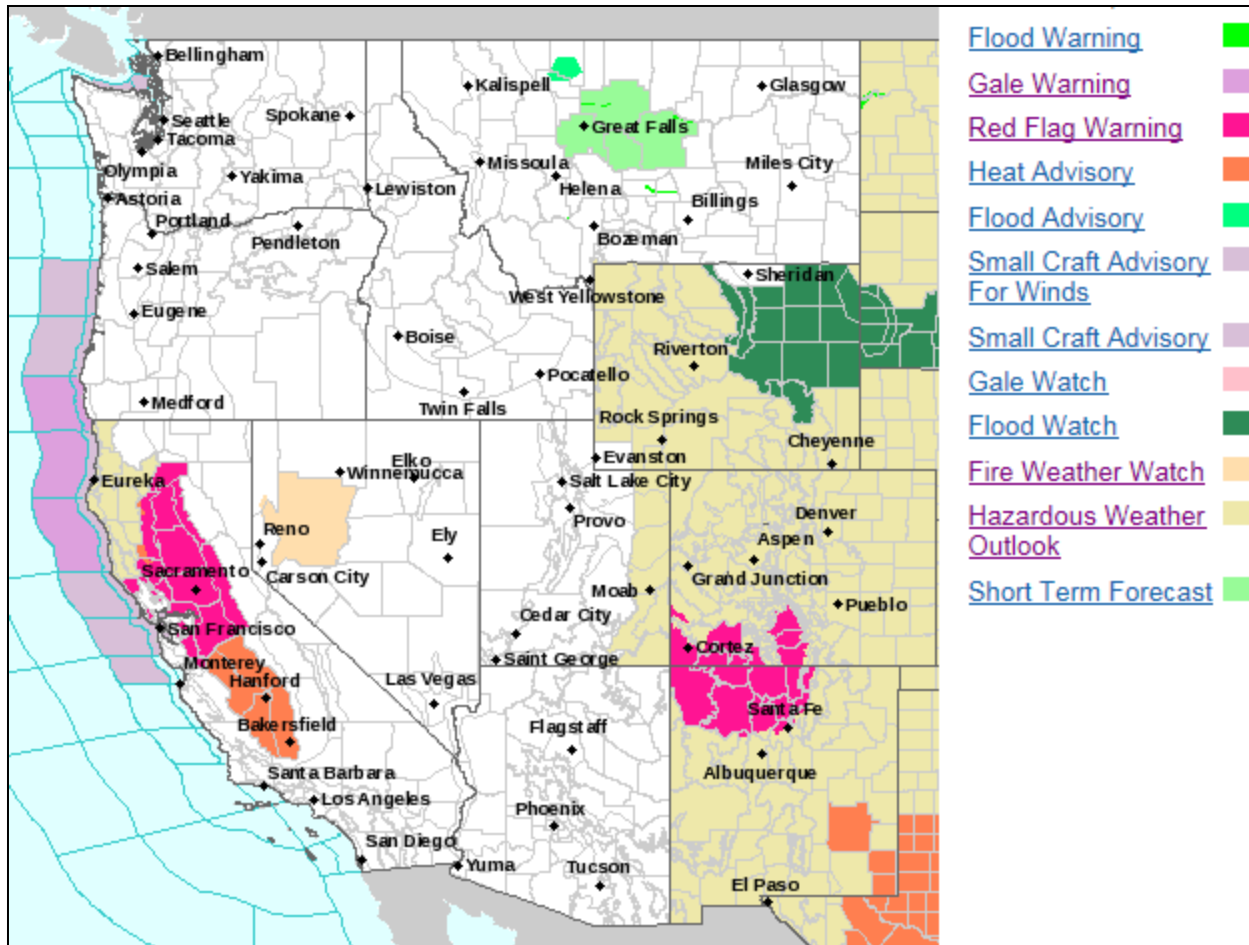

Heat: Continued very hot daytime high temperatures are forecast for the northern Sacramento Valley and foothills today; however, some cooling is expected through the Delta, as the Delta Breeze returns! Normal temperatures return Monday and through the rest of the week.

Fire Weather: Hot temperatures again today combined with locally gusty wind and low humidity will continue areas of increased fire potential. The strongest winds are forecast for the Sacramento Valley, west of Interstate 5, extending into the Coastal Range. Locally gusty wind is also possible through the Northeast Foothills of the Sacramento Valley and Motherlode. Areas of moderate to poor humidity recoveries occur again this morning with minimum humidities this afternoon in the single digits and teens. Cooler temperatures with higher humidity are expected Monday.

SOUTHERN CALIFORNIA

Temperatures closer to seasonal normal will prevail through Monday as high pressure has temporarily weakened. However, another warmup will quickly materialize through the middle of the week with high temperatures forecast to be near 110 degrees across the lower deserts.
